SUMMARY

Junior Java Web Developer with proven leadership and analytical skills. Led a 5-person team to deliver a full-stack restaurant management system. Experienced in requirements analysis, system design, and translating business needs into technical solutions. Proficient in Java (Spring Boot, Servlets/JSP) and modern web technologies. Seeking opportunities to contribute strong technical expertise to ambitious business analysis capabilities.

TECHNICAL SKILLS

Programming:	Java | JavaScript | SQL | HTML
Backend:	Java Servlets/JSP | Spring Boot | DAO Pattern | MVC Pattern
Frontend:	React.js | React Router | Bootstrap | Axios | JSP | Tailwind CSS | JavaScript
Database:	SQL Server | Database Design | Data Modeling
Analysis & Design:	Requirements Gathering | Workflow Analysis | System Design | UML
Tools:	Git

PROJECTS

PizzaConnect - Restaurant Management System | Sep 2024 - Dec 2024

Team Leader (5 members) | Role: Project Lead, Developer & System Analyst

Technologies: Java Servlets/JSP, SQL Server, JavaScript, Tailwind CSS, Selenium

Leadership & Project Management:

- Led 5-person development team, coordinating tasks, conducting code reviews, and ensuring on-time delivery
- Facilitated daily standups and sprint planning, resolving technical blockers and maintaining team productivity

Requirements & System Design:

- Gathered requirements from stakeholders and analyzed restaurant workflows for 5 user roles (Admin, Manager, Waiter, Chef, Customer)
- Designed 5-level order status workflow with automatic state transitions, reducing manual tracking by 80%
- Created comprehensive database schema (15+ tables) with business rules for order management, inventory, and payment processing

Development & Implementation:

- Developed 10+ Java Servlets implementing business logic for POS, Order Management, and monitoring modules using MVC/DAO pattern
- Built responsive admin interfaces with JSP/Tailwind CSS featuring real-time updates, pagination, and role-based access control
- Integrated Inventory Management System with automatic ingredient deduction and low-stock alerts

Impact:

- Successfully delivered production-ready system automating 80% of order management processes, improving operational efficiency and reducing manual errors

ADDITIONAL EXPERIENCE

- Developed multiple web applications using Java Servlets/JSP and Spring Boot framework for university coursework
- Created database-driven applications with SQL Server, implementing complex queries and stored procedures

EDUCATION

FPT University - Hanoi, Vietnam

Bachelor of Software Engineering | Expected Graduation: 2027

Relevant Coursework: Object-Oriented Programming | Data Structures & Algorithms | Database Design | Java Web Application Development | Front-end with React | Web Design | Software Engineering | Software Requirements | Software Testing | UI/UX Design

LANGUAGES: Vietnamese (Native) | English (Professional Working)
